Summary

Senior Product Designer with 10+ years building financial products (digital banking, credit, treasury, BaaS and White Label platforms) and, more recently, AI-powered products and workflows. I work side by side with PMs and engineers and care about quality beyond the handoff: I have led QA, written test plans and caught release-blocking bugs. Open to Senior, Staff and Lead Product Design roles and project-based consulting.

- **Design systems that scale:** built a multi-tenant fintech design system from zero (97 published components, tokens, i18n, versioned releases), ran zero-breakage migrations of 280+ component instances and raised adoption above 90%.
- **Complex B2B and fintech flows:** admin, back-office, credit, treasury, payments and multi-tenant operations, from PRD to high fidelity.
- **White Label at scale:** platforms for banks and partners such as Itaú BBA, with per-client branding and product configuration.
- **AI in the workflow:** built an in-house Figma automation bridge (MCP, 52 tools) and ship WhatsApp AI agents for SMBs with LLMs, Typebot and Docker.
- **Leadership:** led design teams at Social Bank and Paketá: hiring, career plans, DesignOps and mentoring.

Experience

Mercurial Atlantic Investments

Specialist Product Designer & QA Lead | November 2025 - Present (1 year)

Latin America / Asia

Prediction-market platform settling in USDC, spanning a white-label player app, an admin and back-office suite, and partner embed widgets. Worked across product design, design systems and quality assurance.

Product design

- Turned PRDs into flows, wireframes and high-fidelity screens for the player app; the admin panel, covering the full event and market lifecycle (create, approve, suspend, close, cancel, dispute and resolve); the back-office and platform console (finance, access control, risk, players, notifications and multi-tenant operations); and a partner embed widget.
- Created a PRD-to-Figma traceability system covering 10 PRDs, 64 features and 188 scenarios.
- Delivered the brand identity of the white-label player product.

Design systems

- Owned the company design system end to end: architecture across five surfaces, tokens, i18n, versioned releases and changelogs.
- Ran zero-breakage migrations of 280+ component instances at a time and raised design-system adoption in the admin product to over 90%.

Quality assurance

- Led QA for the admin and player products: Gherkin test execution, exploratory testing, browser automation and bug triage.
- Found release-blocking bugs, supported by network-level evidence; turned usability findings into prioritized improvements.
- Wrote test plans for new payment rails.

Research, strategy and DesignOps

- Competitive research on leading prediction-market platforms, UX audits, and a cost and CAC model with launch-pricing recommendations.
- Built an in-house Figma automation bridge (MCP, 52 tools, automated tests) and set up a Storybook/Chromatic pipeline.
- Established release rituals and file governance, and integrated AI deeply into design and QA workflows.

Stealth Startup

Product Design Consultant | January 2026 - Present (10 months)

Brazil

Project-based product design engagements for B2B and fintech companies: CRM/ERP redesign, design systems, UX audits, QA and clickable prototypes.

Featured engagement: Multi-franchise Field CRM (Jul - Sep 2026)

- Context: a multi-franchise group still ran sales inside a dense ERP after trying market CRMs; configuration was hidden in cascading menus, Admin and Seller shared the same shell, and field teams had no mobile rhythm.
- Ran two separate tracks: redesign and QA of the live ERP CRM, and a market-backed proposal for a greenfield platform benchmarked against 12 CRMs.
- Tested 7 functional journeys in staging, versioned the backlog (v1-v3) and built a shared Material-based design system for both products; pivoted the main deliverable from slides to a clickable prototype after stakeholder feedback.
- **Outcome:** 70+ CRM screens, a shared design system, 7 QA journeys and a board-ready platform thesis.

Stealth AI Startup

AI Builder - Conversational AI & Workflow Automation | January 2026 - Present (10 months)

Brazil

Help small and mid-sized businesses organize customer service and operational flows using AI agents on WhatsApp, going from discovery to a working pilot in days and owning the full cycle: problem framing, rapid prototyping, evaluation, deployment and ongoing operation.

- Turn informal, people-dependent processes (FAQs, scheduling, lead intake, follow-ups, urgent requests) into modular multi-agent architectures, each agent with a defined scope and handoff rules.
- Prototype prompts and conversational flows directly with LLMs on low-code platforms, validating with the client early instead of writing long specs.
- Create structured test scripts and safety layers that detect sensitive or urgent cases and route them to a human before any automated reply.
- Make pragmatic integration calls for SMB tools that lack APIs (assisted or hybrid models), keeping human handoff simple; stay model-agnostic and cost-aware across providers.
- Self-host the stack on cloud infrastructure with Docker, monitor instances through internal ops tooling and package the solution as a product (briefing, proposal, contract, pitch deck, project board).
- **Stack:** LLMs (Gemini, OpenRouter, Groq), Typebot, Evolution API (WhatsApp), Docker, DigitalOcean, prompt engineering, Notion.

Accountfy

Senior Product Designer | November 2023 - September 2025 (1 year, 11 months)

- Designed treasury and debt management products focused on cash flow management, debt control and payment optimization, grounded in user research.
- Led the creation of a customizable White Label solution for Itaú BBA, with wireframes, prototypes and user journeys tailored to its business clients.
- Improved platform navigation and features, refining interfaces based on user feedback.
- Collaborated with product, development and stakeholder teams to deliver viable, scalable solutions.

Own Financial Services

Staff Product Designer | October 2022 - November 2023 (1 year, 2 months)

- Designed the experience of a Banking-as-a-Service (BaaS) White Label platform for internal teams and partner companies offering financial products to their own customers.
- Conducted qualitative and quantitative research with end users and partners to keep the platform customizable to different brands and product needs.
- Created journey maps and interaction flows from integration to daily use, and iterated on the design from ongoing user and partner feedback.
- Collaborated with developers and product teams to ensure design viability and scalability.

Paketá Crédito

Design Team Lead | June 2021 - October 2022 (1 year, 5 months) | Remote

- Led design strategy and product portfolio for Personal and Business Banking, focused on CaaS across White Label, B2B and B2C operations.
- Developed White Label credit portals (salary advances and loans), back-office systems for corporate credit configuration and a Cockpit for customer service and credit structuring.
- Contributed to integration projects such as Hamlin for Itaú and workflows that let companies autonomously adjust credit policies.
- Managed DesignOps, budget, recruitment, onboarding, career plans and mentoring; built and evolved the company design system.

Social Bank

Design Team Lead | October 2018 - June 2021 (2 years, 9 months) | Uberlândia, Brazil / Remote

- Led design strategy for digital banking, digital wallets, payment cards and business accounts with payroll and expense management.
- Contributed to M&A initiatives (ValePresente, Zuum, Social Pay), Pix participation, the Banco Capital integration, IDWall onboarding and a UN/UNHCR (ACNUR) card project supporting refugees.
- Led qualitative and quantitative research, usability analysis and workshops; developed the company Design System.
- Supported DesignOps, career plans, mentoring and training for the design team.

Zup Innovation

Product Designer | October 2016 - October 2018 (2 years, 1 month) | Uberlândia, Brazil

- Designed strategic solutions for the financial and telecom sectors: an API management and security platform (adopted by Vivo, Santander and Banco Original), Realwave for real-time telecom plan management and targeting, an integrated CRM, and Cora, a low-code campaign automation platform (Nextel, Santander).
- Ran research, product discovery, usability analysis and workshops; defined flows, wireframes, prototypes and journey maps.

V.T. Design

Designer | January 2013 - October 2016 (3 years, 10 months) | Uberlândia, Brazil

- Created and maintained the brand visual identity, designed print and digital materials, collaborated on website design and produced technical drawings for architecture.

S.O. Design

Intern | January 2011 - January 2013 (2 years, 1 month) | Uberlândia, Brazil

Education

- **Faculdade Pitágoras:** Postgraduate in Data Science and Artificial Intelligence | Nov 2024 - Jul 2025
- **IxDF - The Interaction Design Foundation:** Design Management | 2020
- **Estácio:** MBA, Digital and Multimedia Design | 2018 - 2019
- **IxDF - The Interaction Design Foundation:** Visual Perception & Design, UI | 2018 - 2019
- **Instituto Federal do Triângulo Mineiro (IFTM):** BTech, Internet Systems | 2016 - 2019
- **freeCodeCamp:** Full Stack Web Development Certification | 2016 - 2017
- **Universidade Federal de Uberlândia (UFU):** Bachelor's Degree in Design | 2007 - 2013 (scholarship holder 2011 - 2012; student mentor 2008 - 2010)
- **Instituto Federal do Triângulo Mineiro (IFTM):** Technical Degree in Computer Science | 2007 - 2009

Certifications

Product Design | Fundamentals of Generative AI (Fundamentos da Inteligência Artificial Generativa) | UX Deep Dive: Remote Research | Design Thinking: Data Intelligence | Sketch

Volunteer Experience

Developer Circles Lead | Meta (Facebook)

March 2018 - March 2020 (2 years, 1 month)

- Led the Developer Circles community, organizing workshops, meetups and hackathons.

General Coordinator (Content & Finance) | Encontro Regional dos Estudantes de Design CO-MG

January 2012 - June 2013 (1 year, 6 months)

Core Skills

Product Design | UX Design | UI Design | Design Systems | Figma | Storybook / Chromatic | User Research | Fintech, BaaS & White Label | B2B / Back-office | QA & Test Planning | Conversational AI | LLMs & Prompt Engineering | Anthropic Claude | AI-assisted Design Workflows | DesignOps & Leadership
